No activity can be significant and urgent to affect human health, safety and the environment.

Occupational Health & Safety / Environment

HSEplus⁺

HAKSOFT[®]
“The knowledge is power”

INTRANET
INFORMATION TECHNOLOGIES

- It not only covers all aspects required by ISO 45001, but clearly goes already beyond
- It is accessible from any place and on any platform, where Internet is available
- HSEplus provides end-to-end solutions
- It makes you do things right and on time
- Actions and to do list are placed on HSEPlus calendar, e-mails in application notifications

HSE Robot

1. Conceptual Elements

2. Technical Elements

-What is our strategic OHS vision?

HSEPlus : HSE vision is zero (working without occupational accident & illness)

-What is our current OHS environment?

HSEPlus : Existing situation analysis (AS-IS)

-What OHS environment do we want to achieve?

HSEPlus : Entirely ISO 45001 Conformity (TO-BE)

-What business requirements need to be met to achieve the OSH vision?

HSEPlus : Proactivity, Workers Participation, Improving OHS Culture, Benefit Sustainability

-What IT requirements need to be met to achieve the OHS vision?

HSEPlus : Centralized Database, Web Based & Mobile Application, Decision Making Support System

-What resources are required to achieve the OHS vision?

HSEPlus : Trained and qualified personnel, certified equipment, effective maintenance, certified & appropriate materials, occupational hygiene measurements

-What specific actions will be taken to achieve the OHS vision?

HSEPlus : Risk based management (Dynamic Finding Management, Effective preventive and corrective actions & tracking)

-How will OHS accountability be allocated and enforced?

HSEPlus : Assigning right person for the right job, performance evaluation

-How will the OHS strategy be measured, reviewed and revised as needed?

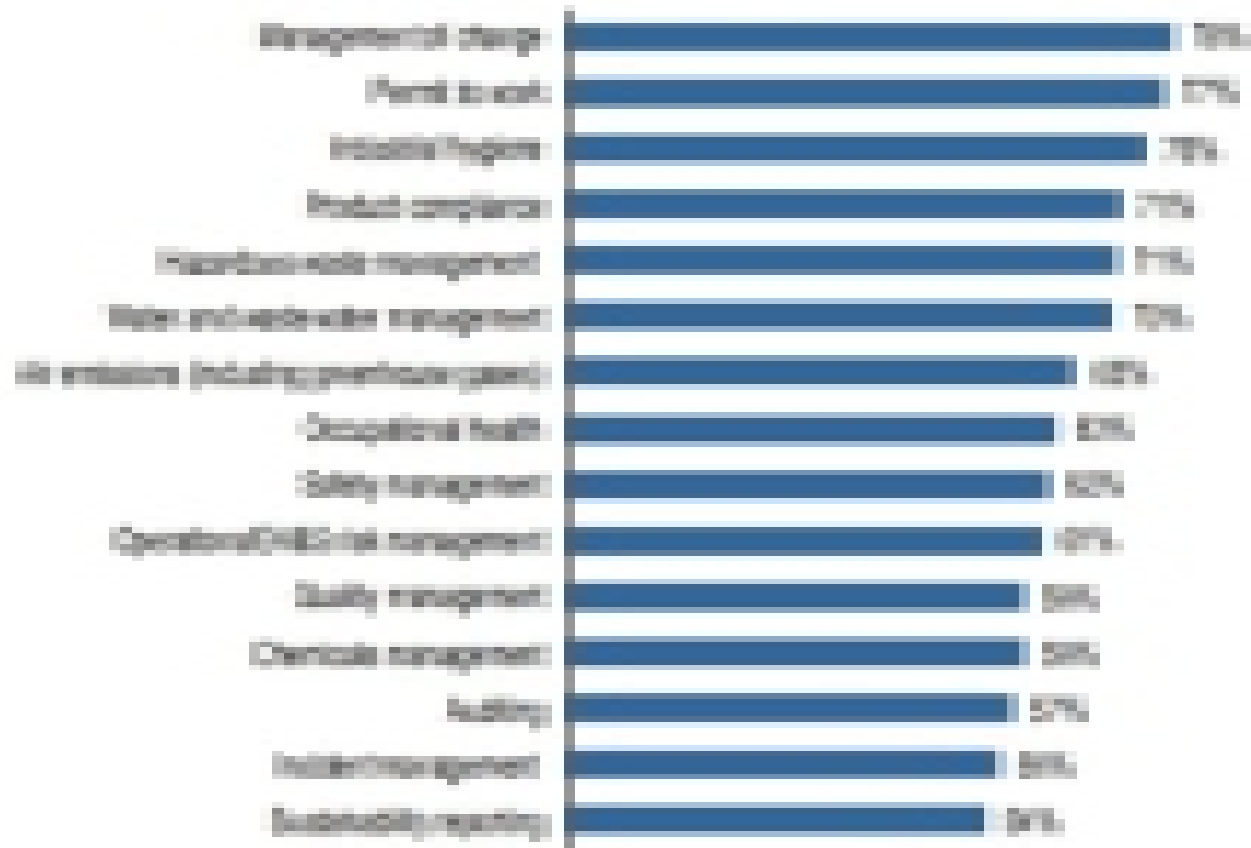

HSEPlus : HSE KPI's & evaluation, management review (BI reporting)

-How will the EH&S strategy adapt to future organizational changes?

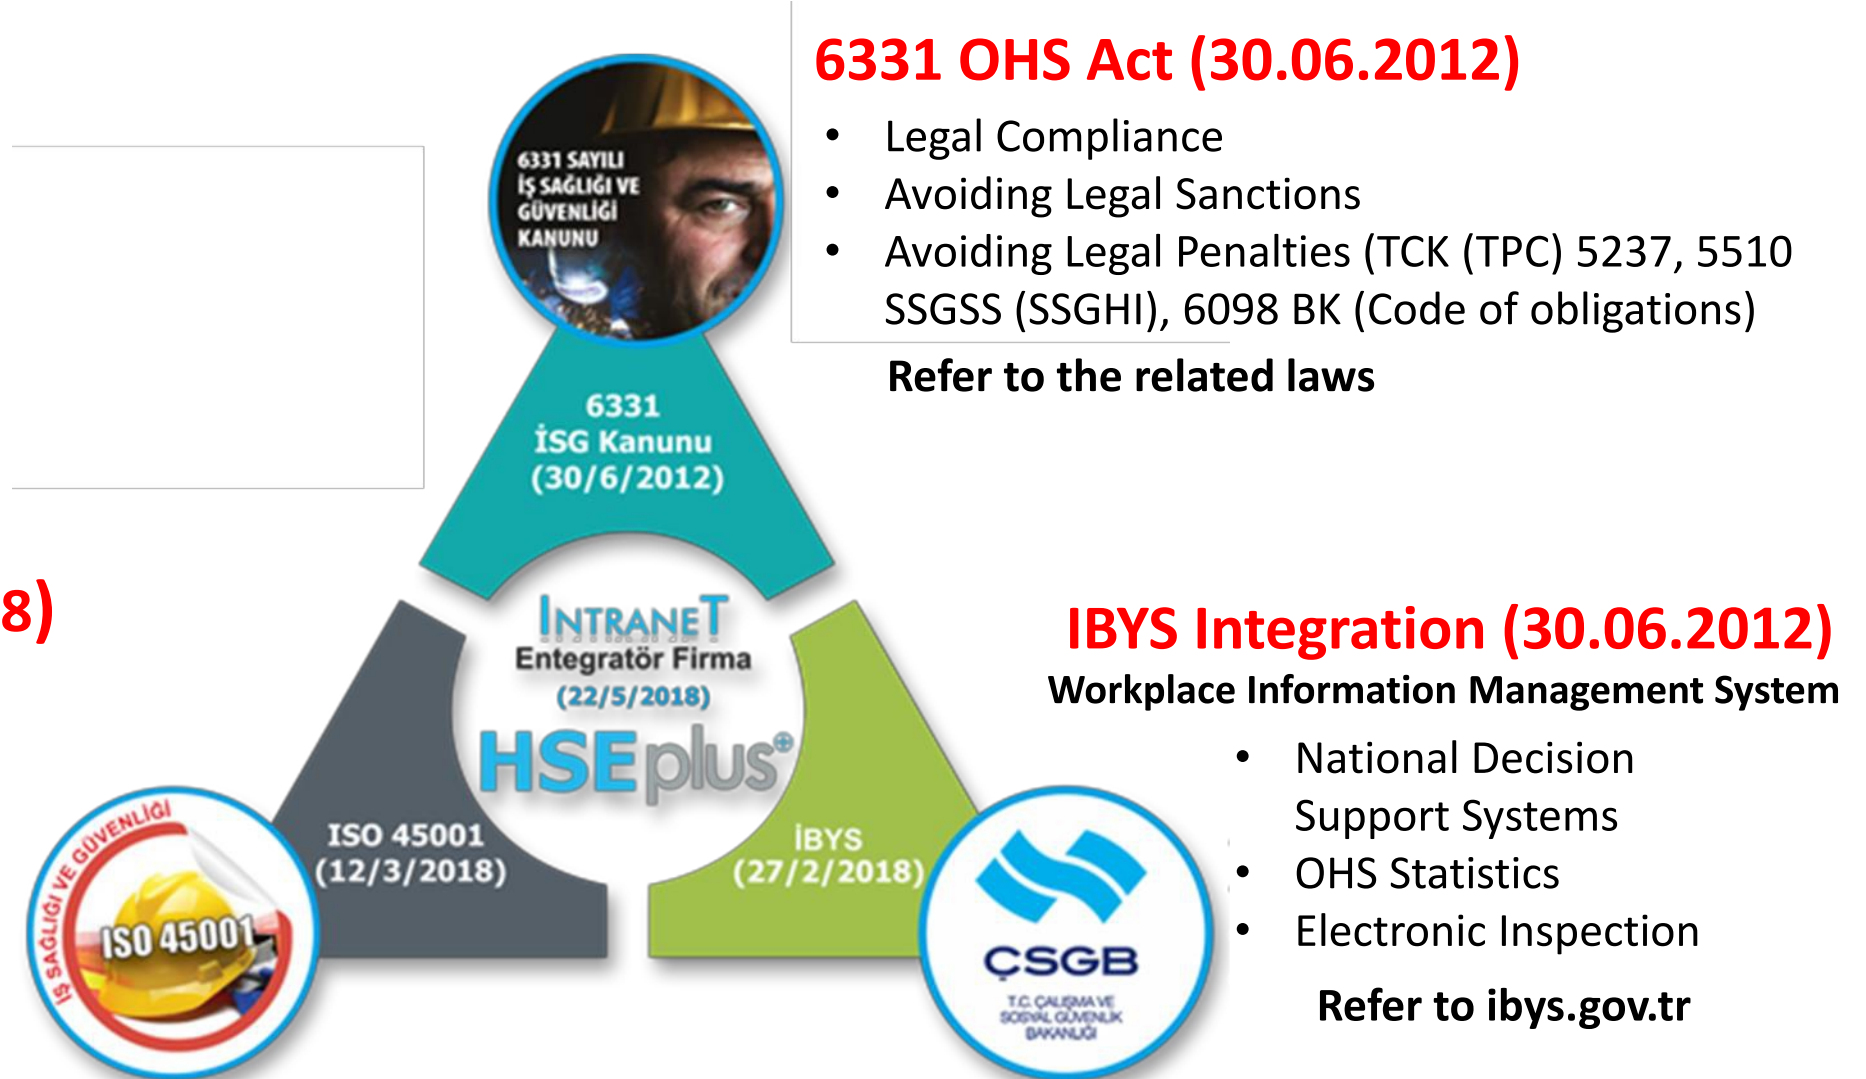

HSEPlus : Management of change

Most Firms Do Not Use Commercial Software To Manage OHSQ Elements

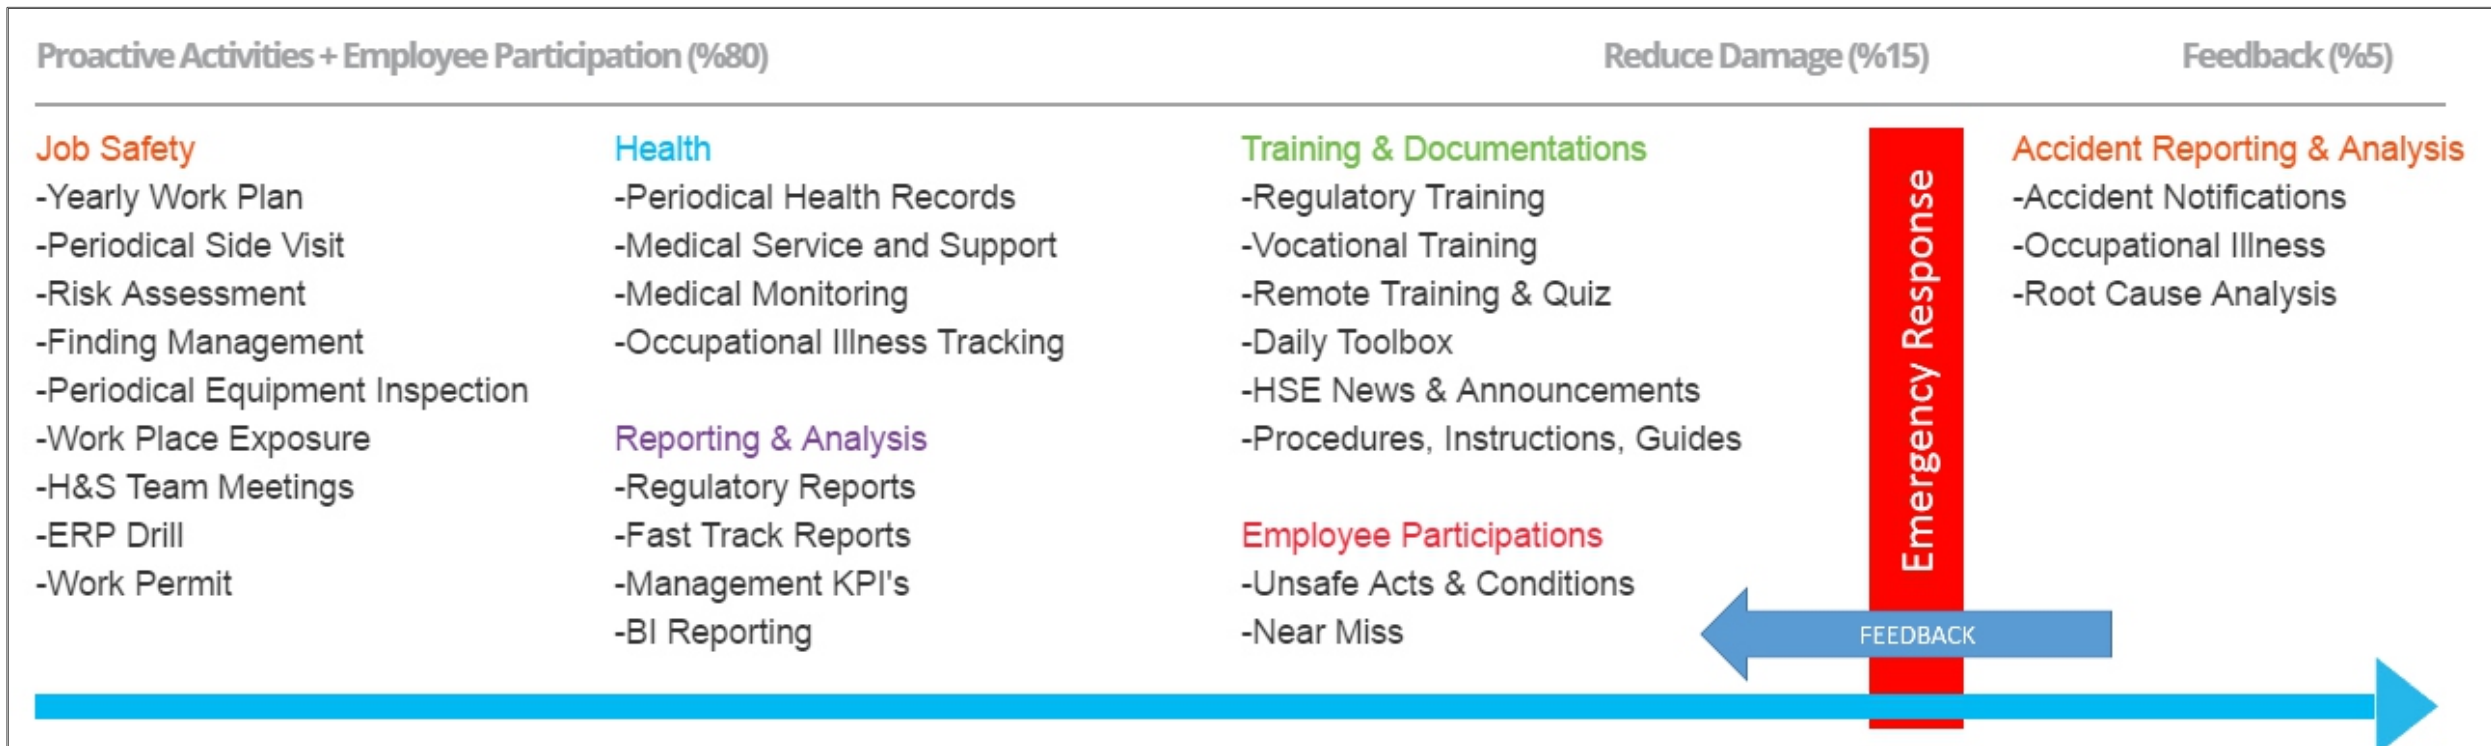

"Do you use commercial OHSQ management software for the following?"
 (Responses from firms who selected "Not using commercial software")

ISO 45001 OHS Management Standards
published in March 12th, 2018

Integration & Compliance with other ISO Standards

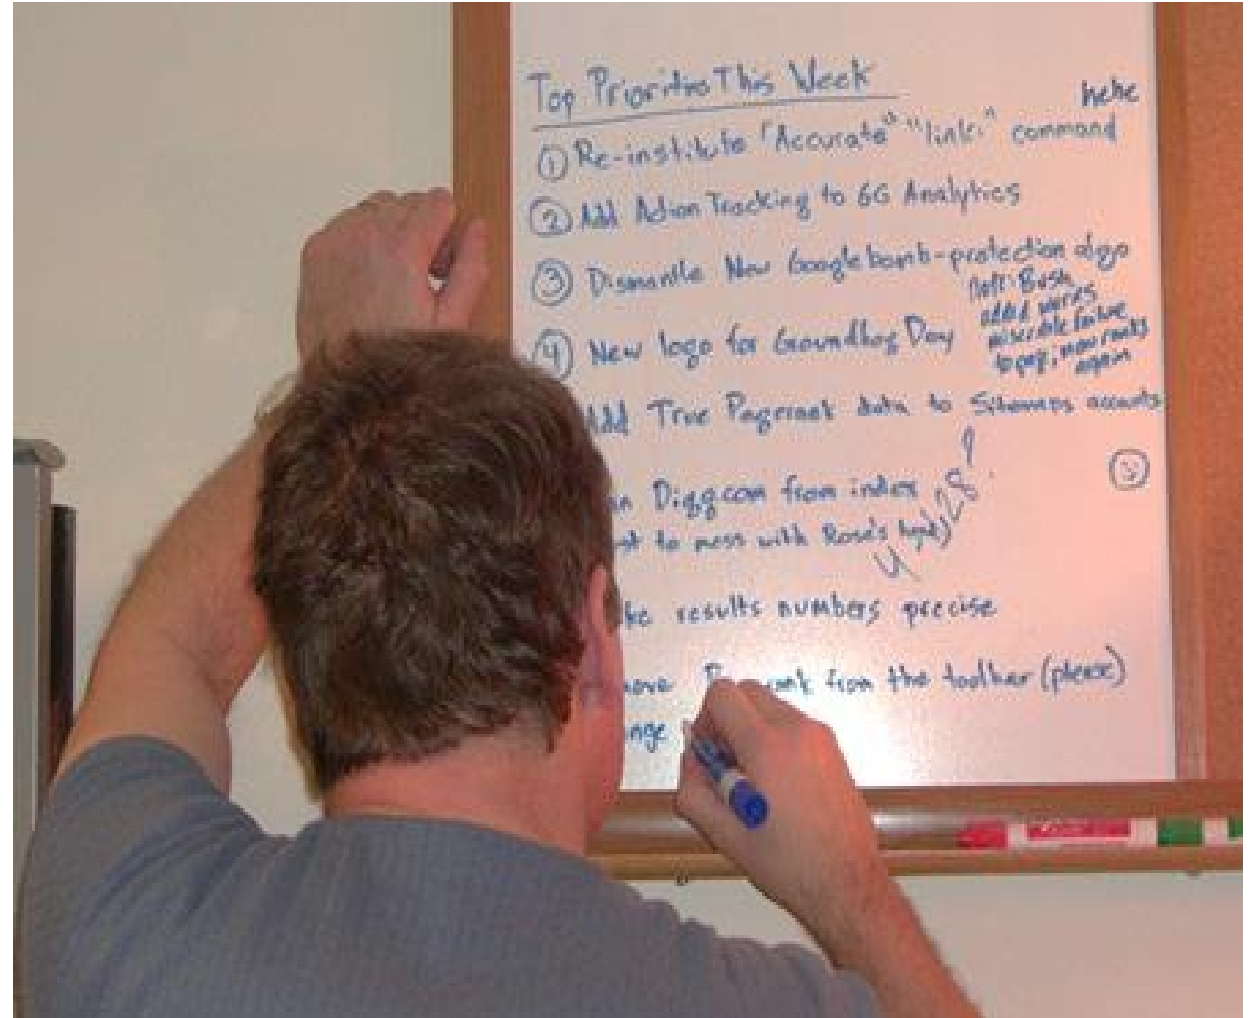

- ISO 9001 (Quality)
- ISO 14001 (Environmental)
- ISO 27001 (Information Security)
- ISO 55001 (Asset)
- ISO 31000 (Risk Management)

- Specify OHS Policy and Targets – Leadership and Commitment
- Dissemination of OHS Culture
- Identifying the hazards related to the activities, defining and classifying the risks and specifying the control measures
- Specify the occupational trainings related to the legislation, working environment, PPE and certificates etc. and monitoring the assigned staff
- Increasing the awareness about hazards and risks, providing the workers to play active roles
- Evaluating and improving the OHS performance planning the appropriate measures and actions

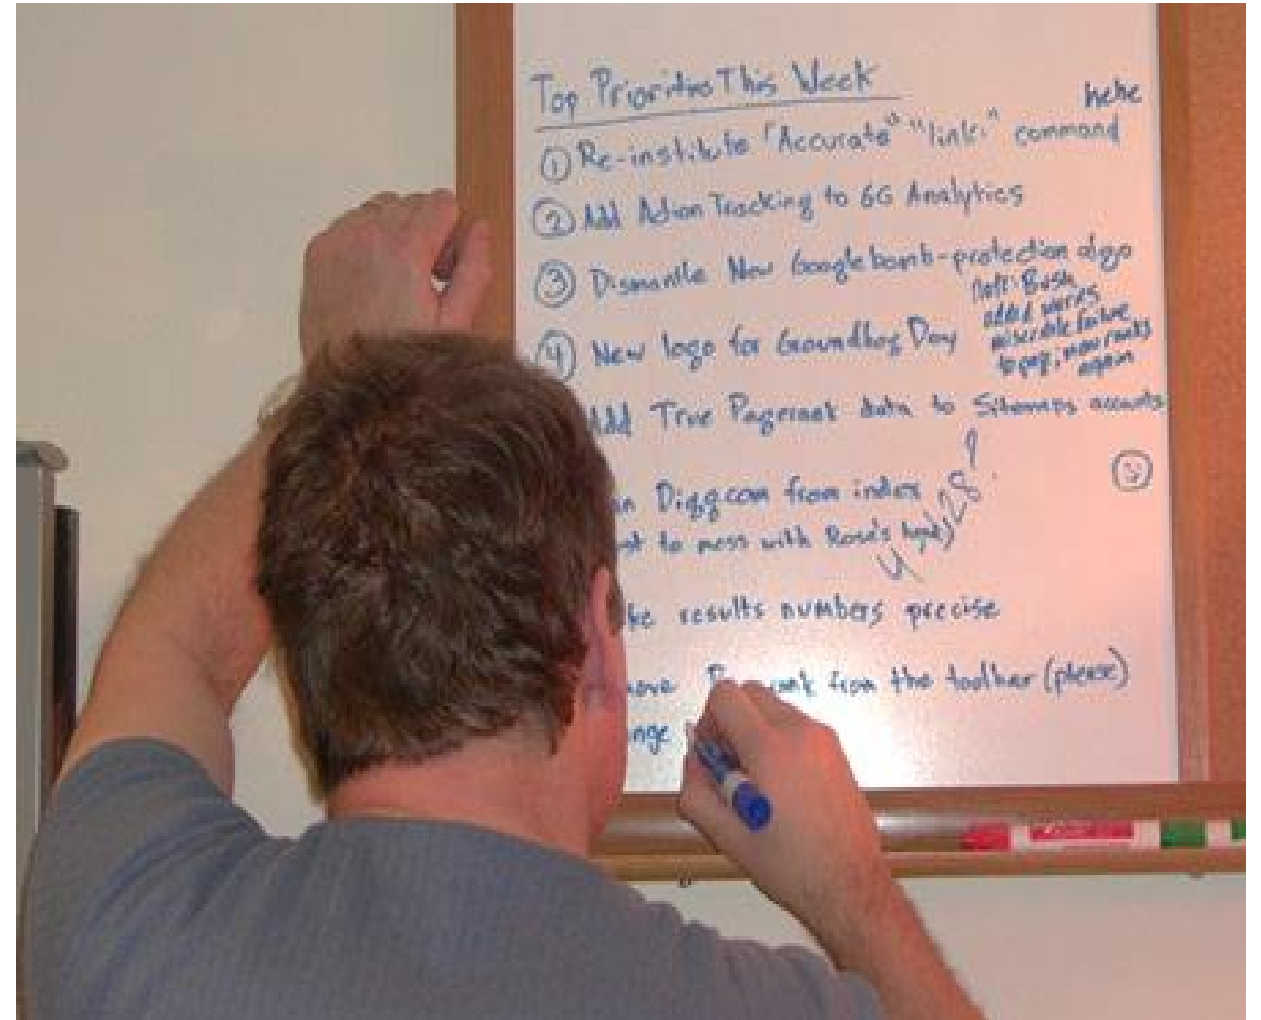

PDCA Cycle

Can all these be achieved
by
good old pen & paper?

Can all these be achieved
by
good old pen & paper?

HSEplus is an all-encompassing safety management system that allows safety professionals to manage all safety related activities within one system, such as:

- HSEPlus Platform
- Location Management
- Organisation Management (Hierarchy)
- Employee Management & Task Descriptions
- Dashboard & Calendar Management
- Action and Notification Management
- Procedure & Document Management
- HSE News & Announcements
- Emergency Plan and Drill
- HSE Committee Meetings & Minutes
- Hazard Communication
- Risk Assessment & Corrective Actions
- Checklist and RA Templates
- Employee Participation (NM, SOC etc)
- Medical Assessment & Monitoring
- Occupational Illness Tracking
- Education / Training Management
- Remote Training & Online Quiz
- Toolbox Trainings
- Equipment Management & PPD
- Contractor & Sub Contractor MS.
- Permit to Work
- Accident Reporting & Root Cause
- Occupational Hygiene Measurement
- Regulatory Reports & Drill Down
- Score Cards
- HSEPlus Analytics (KPI Reporting)
- Entegrated Mobile Applications (Native)

ROBOTIC & DYNAMIC METHODS IN HSE MS

Software Integration	Manual interfaces and document uploads	Integration with other enterprise software and systems	Development of native mobile apps with offline functionality	% 100

HSEplus is a module of IntraPrise.

HSE Plus is built on IntraPrise modular application web-based platform, designed to be integrated within itself, while it can be fully compatible with other ERP systems(SAP, LOGO, ORACLE / SQL Base Applications) to simplify and perfect the workflow for the corporations.

Robotic System

HSEPlus values human life as much as profitability. Therefore, it is designed to eliminate human mistakes that causes incidents and loss. It's **intelligent HSE robot** technology is the strongest asset among it's competitors that plans necessary works required by the compliance.

HSEplus⁺
"More Than HSE Application"

Powered by  **INTRAPRISE⁺**
Integrated Solutions

Leave the workload to it, you focus on.

The HSE Robot has the ability to assist the responsibilities in the works, to prevent potential data mistakes, to provide reminders and warnings as an HSE Expert.

-It facilitates OHS operations based on the **Location** and **Classification of Hazards** by means of existing matrices.

-Coordinates the mandatory and intended trainings, staff with or without training are listed, warns the next training on time.

-Coordinates the site visits of Occupational Safety Expert and Occupational Physician based on the number of employees and reconcile

-Coordinates the assignment of HSE and Emergency Teams.

-Provide the draft of Annual Action Plan (AAP) to be prepared.

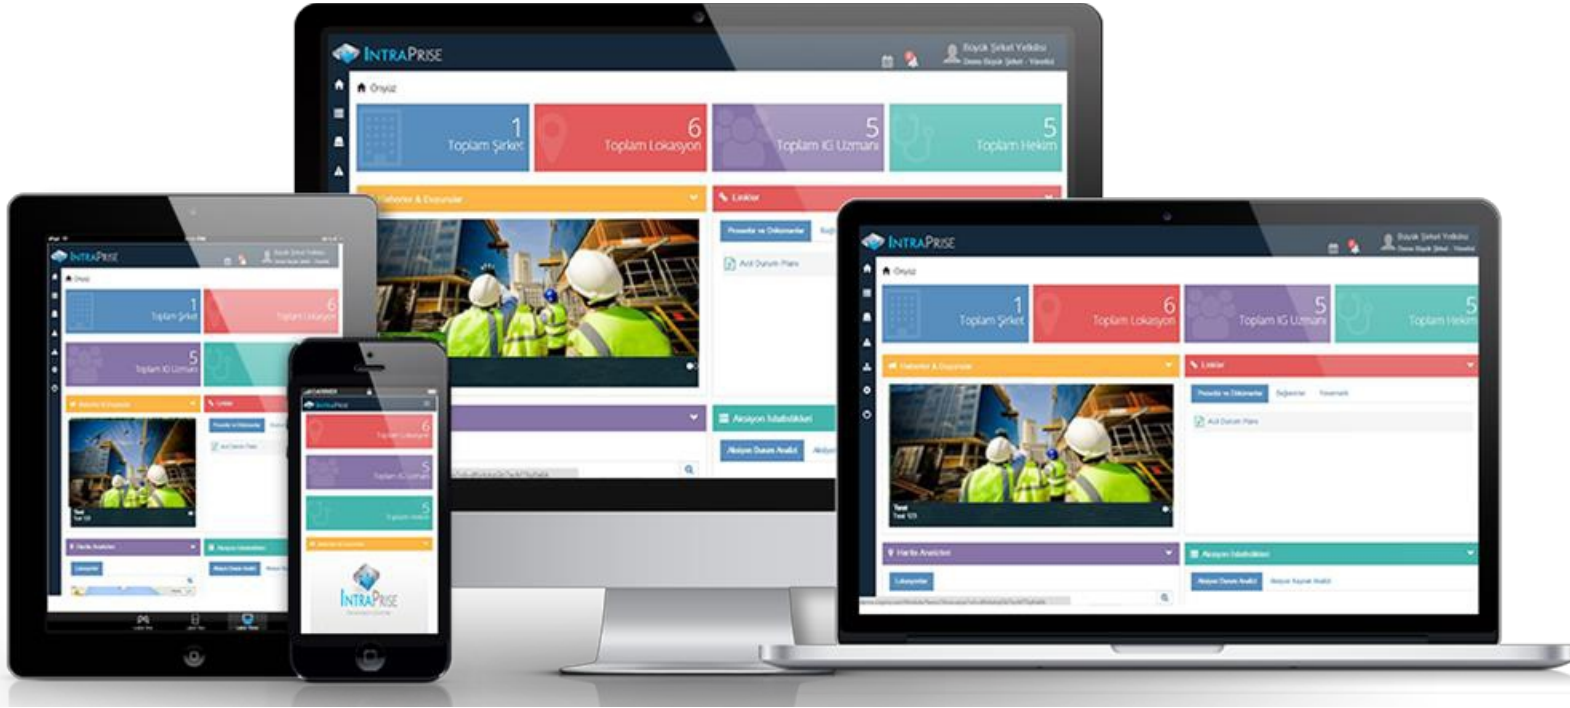

Responsive (Adaptive) design

HSEplus has been developed on the basis of **recently adopted technologies** to facilitate the work of users.

It is a **well-known, uncomplicated** design reducing the **challenges** and **difficulties** of work done.

From personal computers to tablets and smartphones, there is a structure to be used in every environment.

The frontal design which can be customized according to task descriptions makes the work more fun.

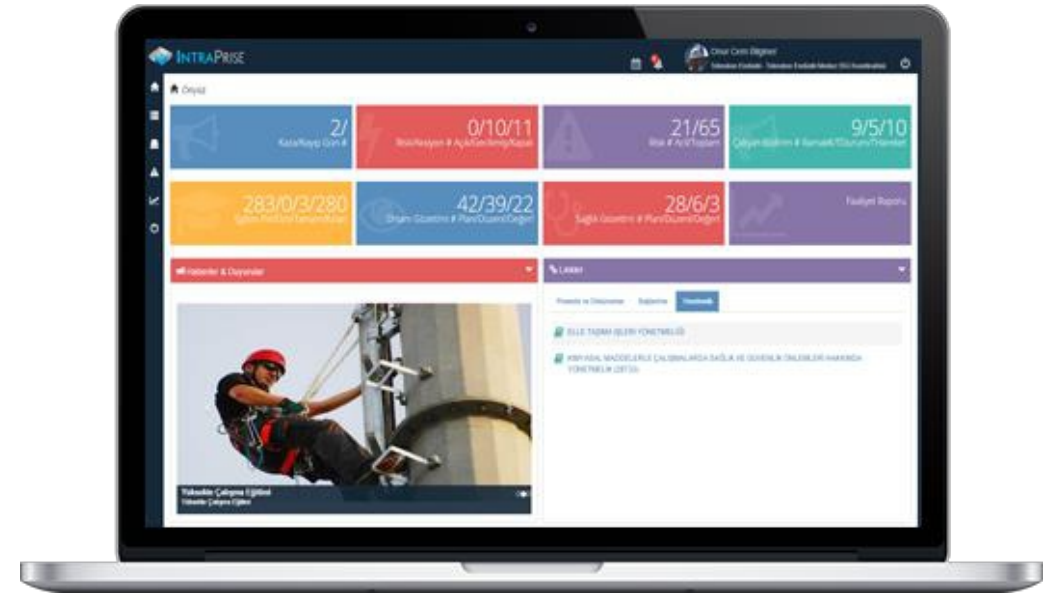

Easy To Use – Contemporary Design

IntraPrise aims availability. Designing an application for users to enjoy using is very important. User experience and functionality are the fundamental of application development. IntraPrise is designed by taking this fundamental into the consideration .

Personal Dashboard

Dashboard is exclusively customized. There is no need for unwanted stuff taking space on your dashboard. Users will see only things that are related to their workflow.

HSEplus⁺ Creating instant (dynamic) findings & notifications

Pen and paper out!

-Creating **Quick Findings** by means of **Tablet**,
Defining the non-comformity by using the risk
assessment and checklists .

-Sending the near miss, hazardous situation
and hazardous behavior notifications with
photo through **Android and IOS apps** with
smart mobile phones.

The screenshot displays the INTRAPRISE software interface. The top navigation bar includes the company name 'INTRAPRISE', the user name 'Aysun Uylar', and the role 'RPT REKLAM - RPT REKLAM ve Prom. Merkez İG Uzmanı'. The main content area is titled 'Risk Analizi' and features a progress indicator with four steps: 1. Genel Bilgiler, 2. Risk Analizi, 3. Bulgular, and 4. Özet Ekran. Below this, there is a section for 'Form Bilgileri' and a table of findings ('Bulgular').

Bulgu No	Alt Saha	Alt Saha Tipi	Tehlike	Tehlike Açıklama	Büdet	Ölçülük	Puan	Sonuç	Öneri	Dosya
540300071	RPT REKLAM ve Prom. Hiz. Paz. San. Tic. Ltd. Şti. Merkez	Şantiye Sahası	Malzeme ve Ekipman Taşınması	İskele Kurulum ve Söküm çalışmalarında uygunuz veya insan gücüyle malzeme ve ekipmanlar taşınmakta.	Cidd - 4	Yüksek - 4	16	Çok Acil	İskele malzemelerinin yüksekçe güvenli bir şekilde taşınmasını sağlayacak sistemlerin kullanılması	

At the bottom of the interface, there are buttons for 'Geri', 'Özet Ekran', and 'İleri'.

Ready and Customized Template Creation Structure

- A large number of pre-prepared Risk Assessment Templates based on key sectors
- Company-specific, the ability to create their own templates by experts.
- Ability to create checklists with (Y/N) or score which can be prepared for special operations by the company.
- Ability to drive new templates from existing or created templates.
- Ability to create Risk Assessment form versions from templates.

The image displays three overlapping screenshots of the INTRAPRISE software interface, demonstrating its capabilities in creating and managing Risk Assessment (RA) and Checklist templates.

Top Screenshot: Risk Assessment Template
 This screenshot shows a table with columns for 'No', 'Yapılan İş / Ekipman / Ortam', 'Tehlike Grup', 'Tehlike Tanımı', 'Risk', 'Etkilenenler', 'S', 'D', 'R', 'O', 'Yasal Zorunluluk', 'Önemli Tedbirler', and 'S', 'D', 'R', 'O'. The table contains several rows of data, including risk assessments for 'Banyo Saha', 'Iskele Kurulum ve Ekipman Tayanması', and 'Iskele Kurulum ve Sokum Çalışmalarında Yorgunluk ve Yaralanma Riski'. A 'Yeni Ekle' button is visible in the top right corner.

Middle Screenshot: Selection Dialog
 This screenshot shows a dialog box for selecting a 'Tehlike Tanımı' (Hazard Definition). The dialog has a search bar and a list of options including 'Seçiniz', 'Açıkta Kalma Depozitama', 'Akaryakıt İstasyonu', 'Akaryakıt Terminali', 'Bina İnşaat İşleri', 'Boruların Sızması', 'Bölge Çıkışı', 'Cemeteri Üstelini Fabrikası', 'Dağılım Depozitama', 'Ekipman İnşaat ve Montaj', 'Kargo Bölge Müdahallığı', 'Kargo Bölge Müdahallığı', 'Kargo Tiplerinde Montaj', 'Makina Montaj İşleri', 'Makina Tamir İşleri', 'Merkezi ve İnşaat İşleri', 'Merkez Ofis', 'Orta Saha', 'Palyajın İzale Depozitama', 'İptal', 'Kaydet Vb Devamı', and 'Kaydet'.

Bottom Screenshot: Checklist Template
 This screenshot shows a table with columns for 'No', 'Kontrol Listesi Grup', and 'Soru'. The table contains several rows of checklist items, such as '5403000611 Elektrik Yüksek Akım Panosu kontrolü mi?', '5403000610 Makine ve Ekipman Makine ve Ekipmanlar doğru yerlerde mi?', '5403000609 Temizlik Soyunma Odası ve Banyo var mı?', '5403000608 Makine ve Ekipman Makine koruyucuları yerleri mi?', '5403000607 Elektrik Kablolama ve Donanım', and '5403000606 Elektrik Topraklama Durumu'. A 'Yeni Ekle' button is visible in the top right corner.

End to End Solution

HSEplus is engineered to minimize data entry time and provide accurate reports on every level and aspect of the business anywhere at anytime. It is **completely Interactive and User Friendly**.

It Makes You Do Things Right & On Time!

Robot **plans** according to compliance and reminds duties of HSE Director, HSE Expert, Doctor by assigning them actions / tasks. REMEMBER - PDCA !

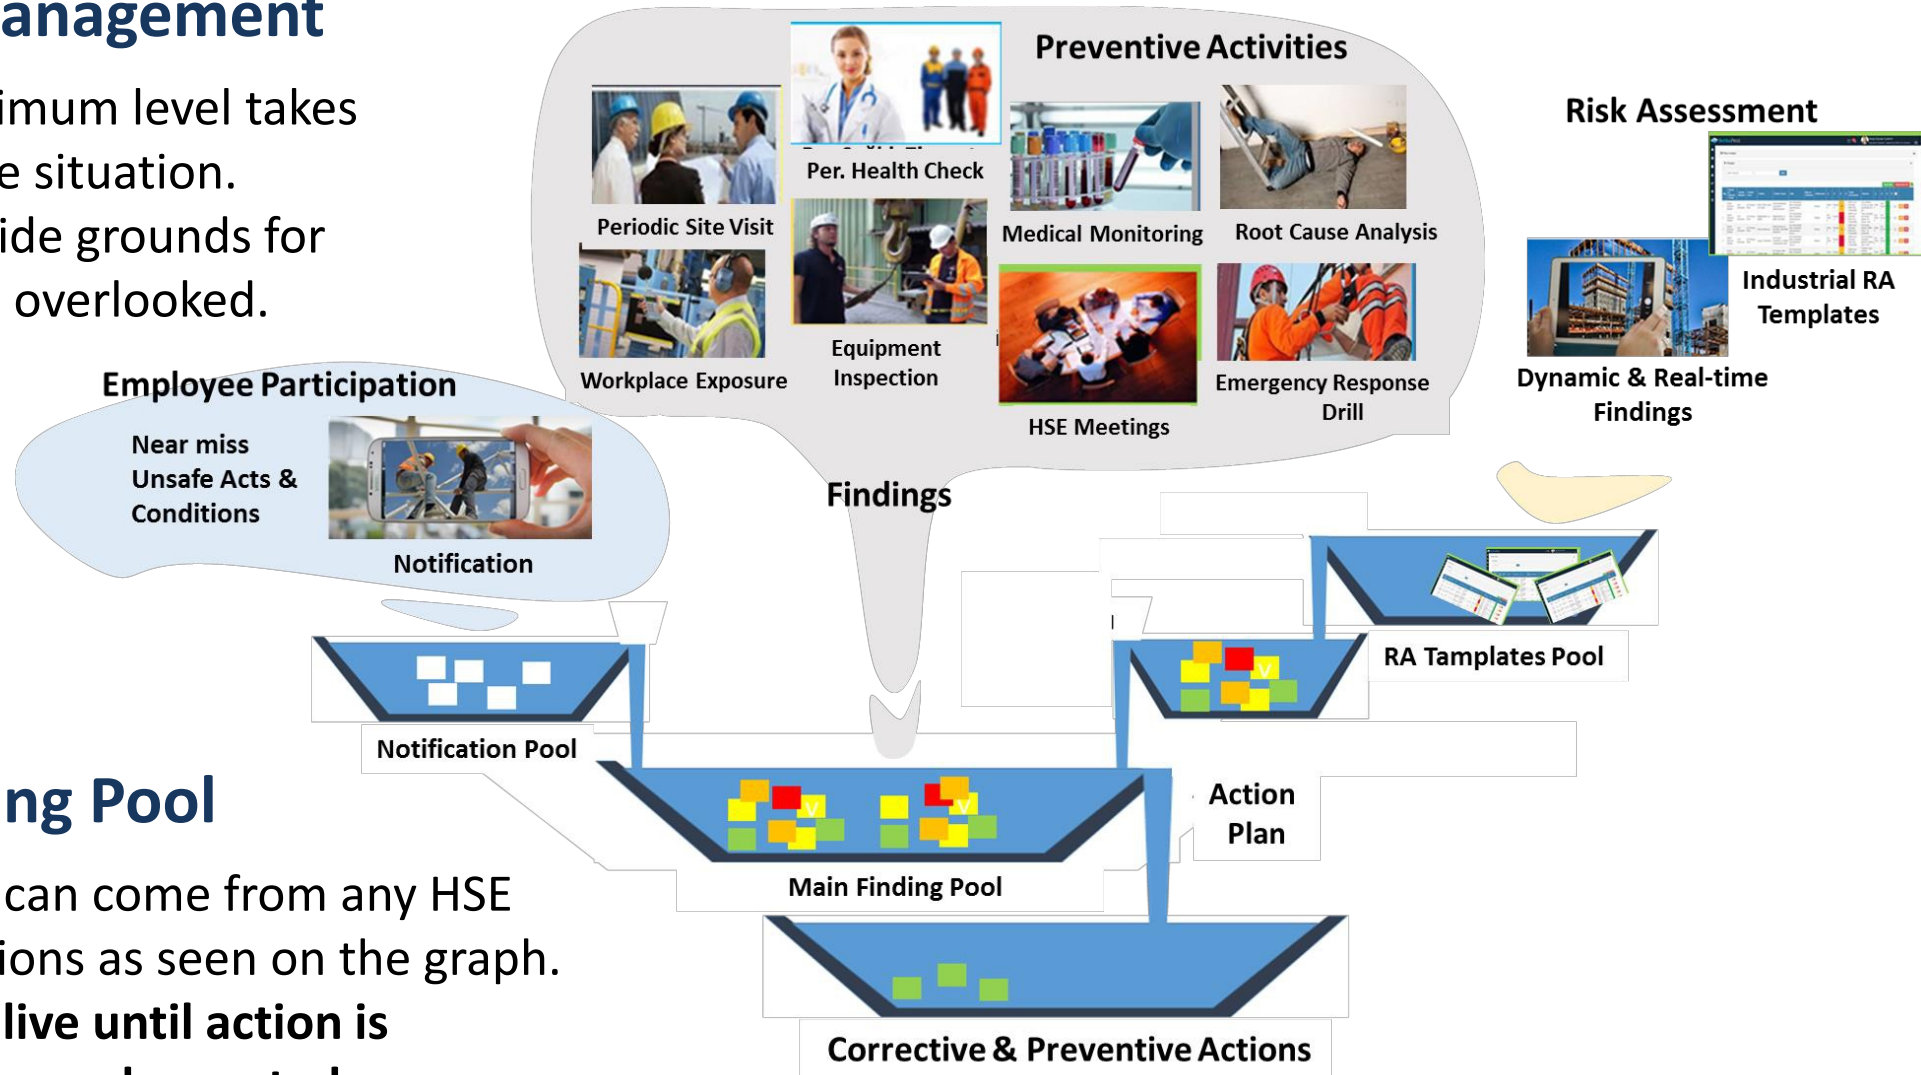

Never Miss An Action / Task

There is no place for forgotten tasks. **HSEplus action engine** is designed to create, follow, report principles. Therefore **there are no actions unreported** in the system. Actions are placed on Google / Outlook Calendars, Emails, In application notifications.

Continuous HSE Management

Bringing the risks to minimum level takes constant attention on the situation. HSEPlus target is to provide grounds for every situation not to be overlooked.

Main Finding Pool

Risky findings can come from any HSE forms and actions as seen on the graph. Findings are alive until action is assigned, taken and reported.

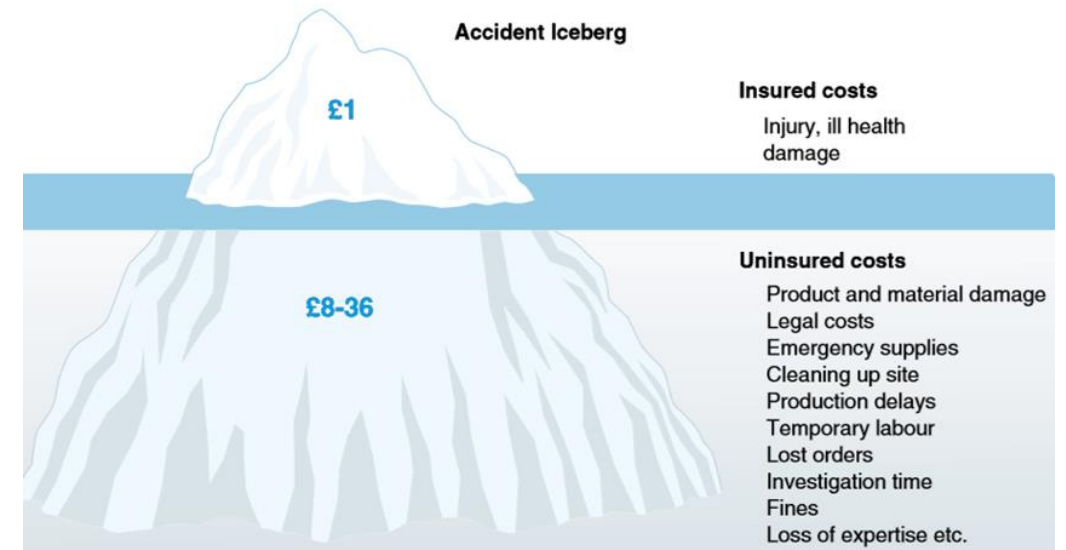

Corrective and Preventive Actions

HSEPlus comes very strong at this point. Unfortunately, experiences have indicated that, risk assessment is not the sole solution to problems. HSEPlus does not tolerate risks to be overlooked. Finding management **will not allow any risk closures without taking and reporting any action to lower that particular risk value.**

Steps of Findings Management

- Root Cause Analysis related to Findings.
- Action Assigned (one or more) to Responsibles.
- Cost & Benefit Identification.
- Revision & Mitigation.
- Elimination of Findings
- Closeout .

Smart reports, quick decisions.

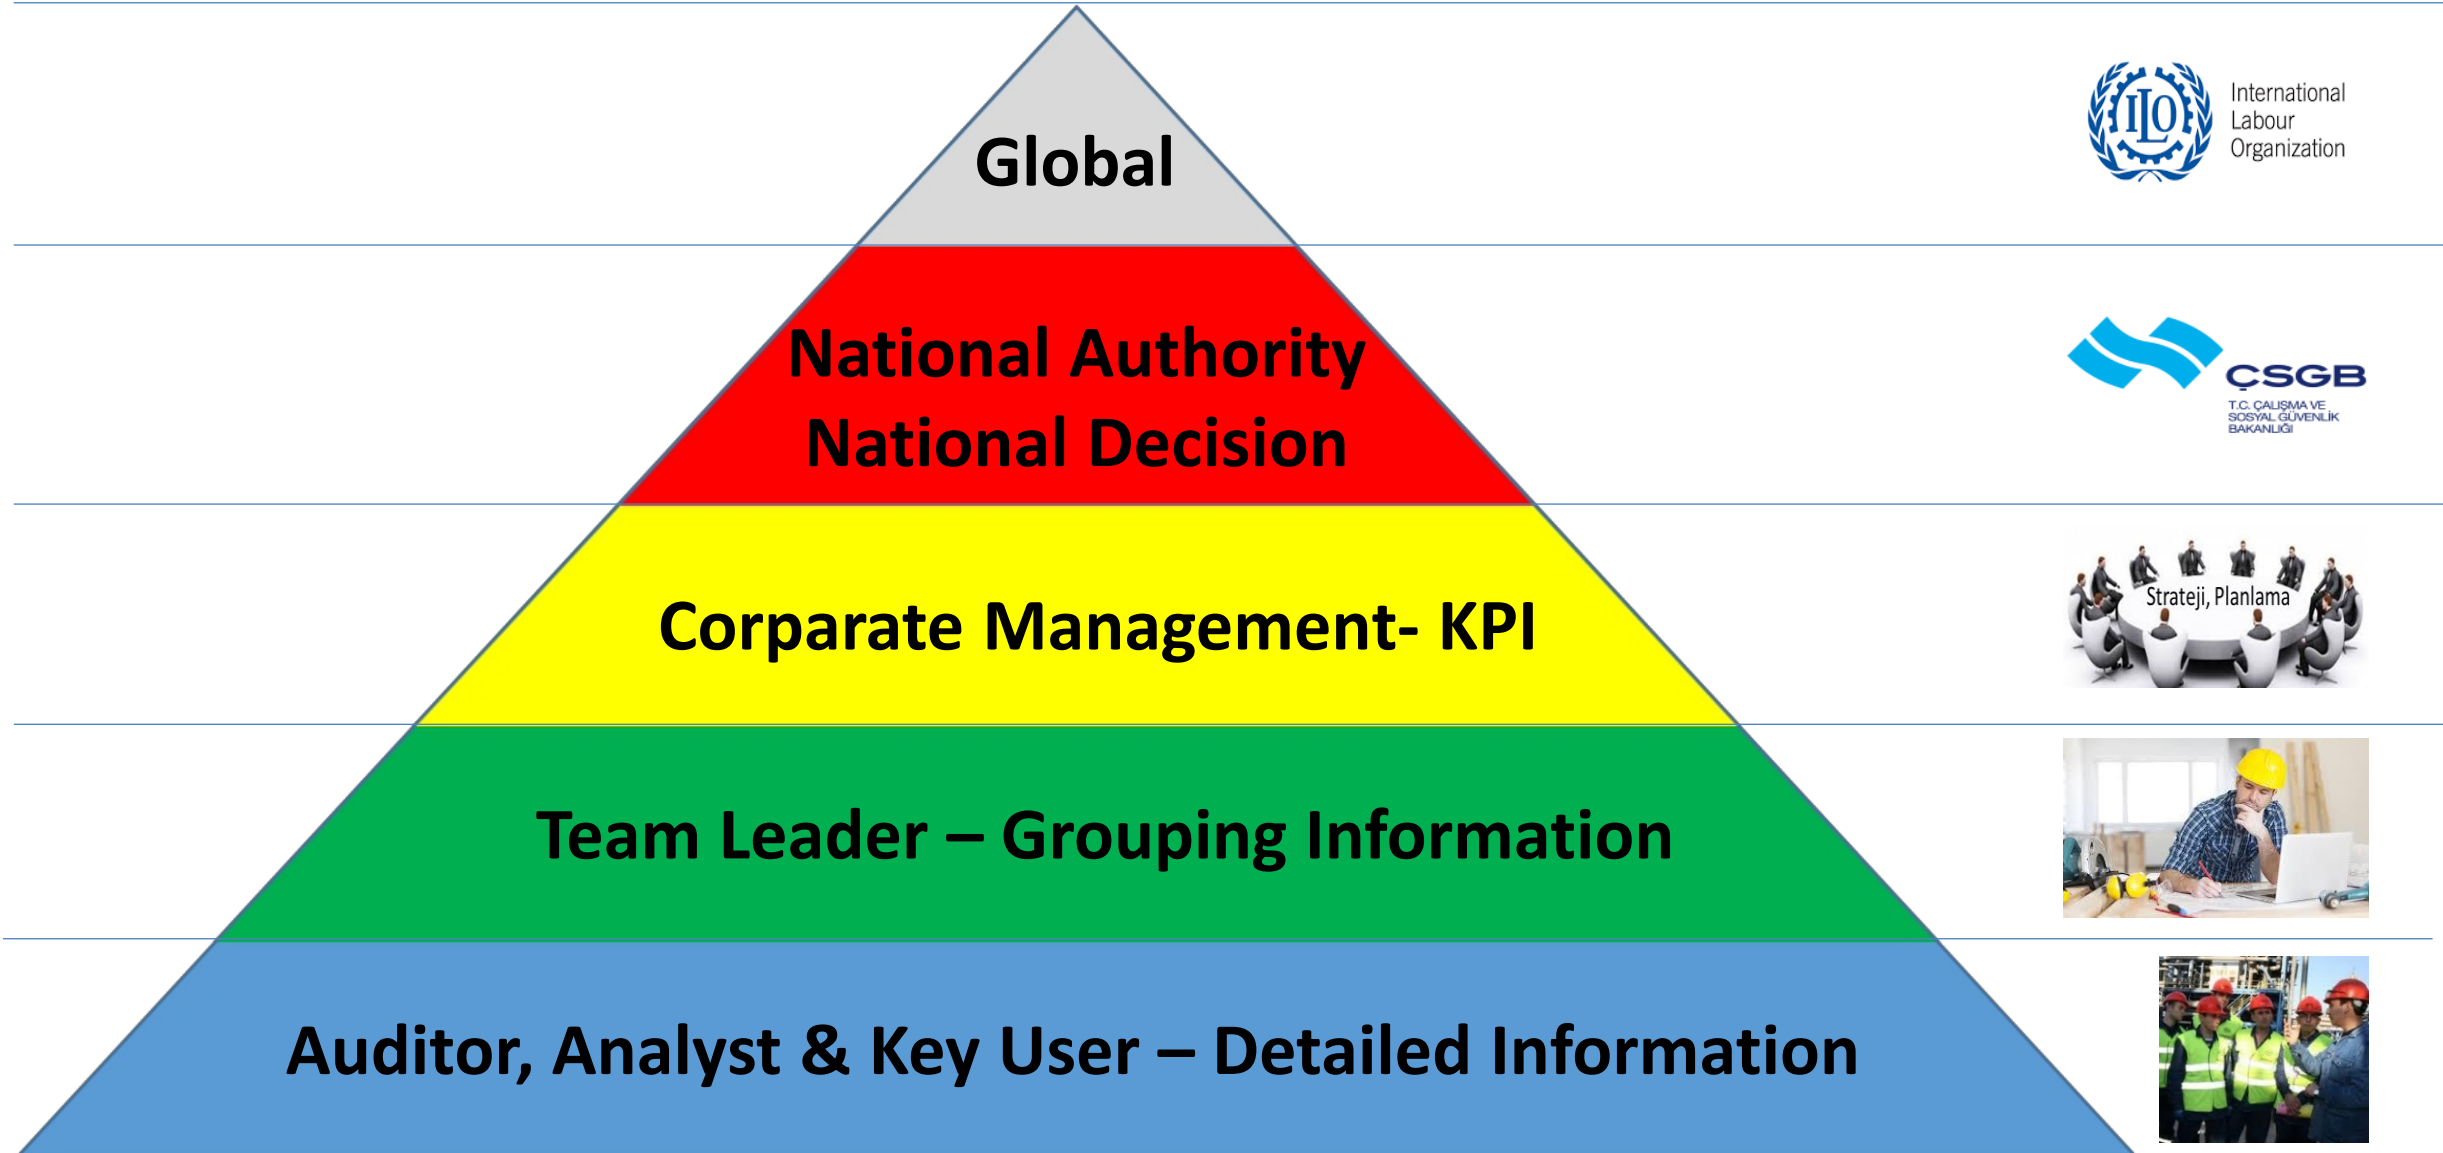

HSEplus helps the managers to decide the correct decision providing the **best formatted, reliable data at the right time and from everywhere.**

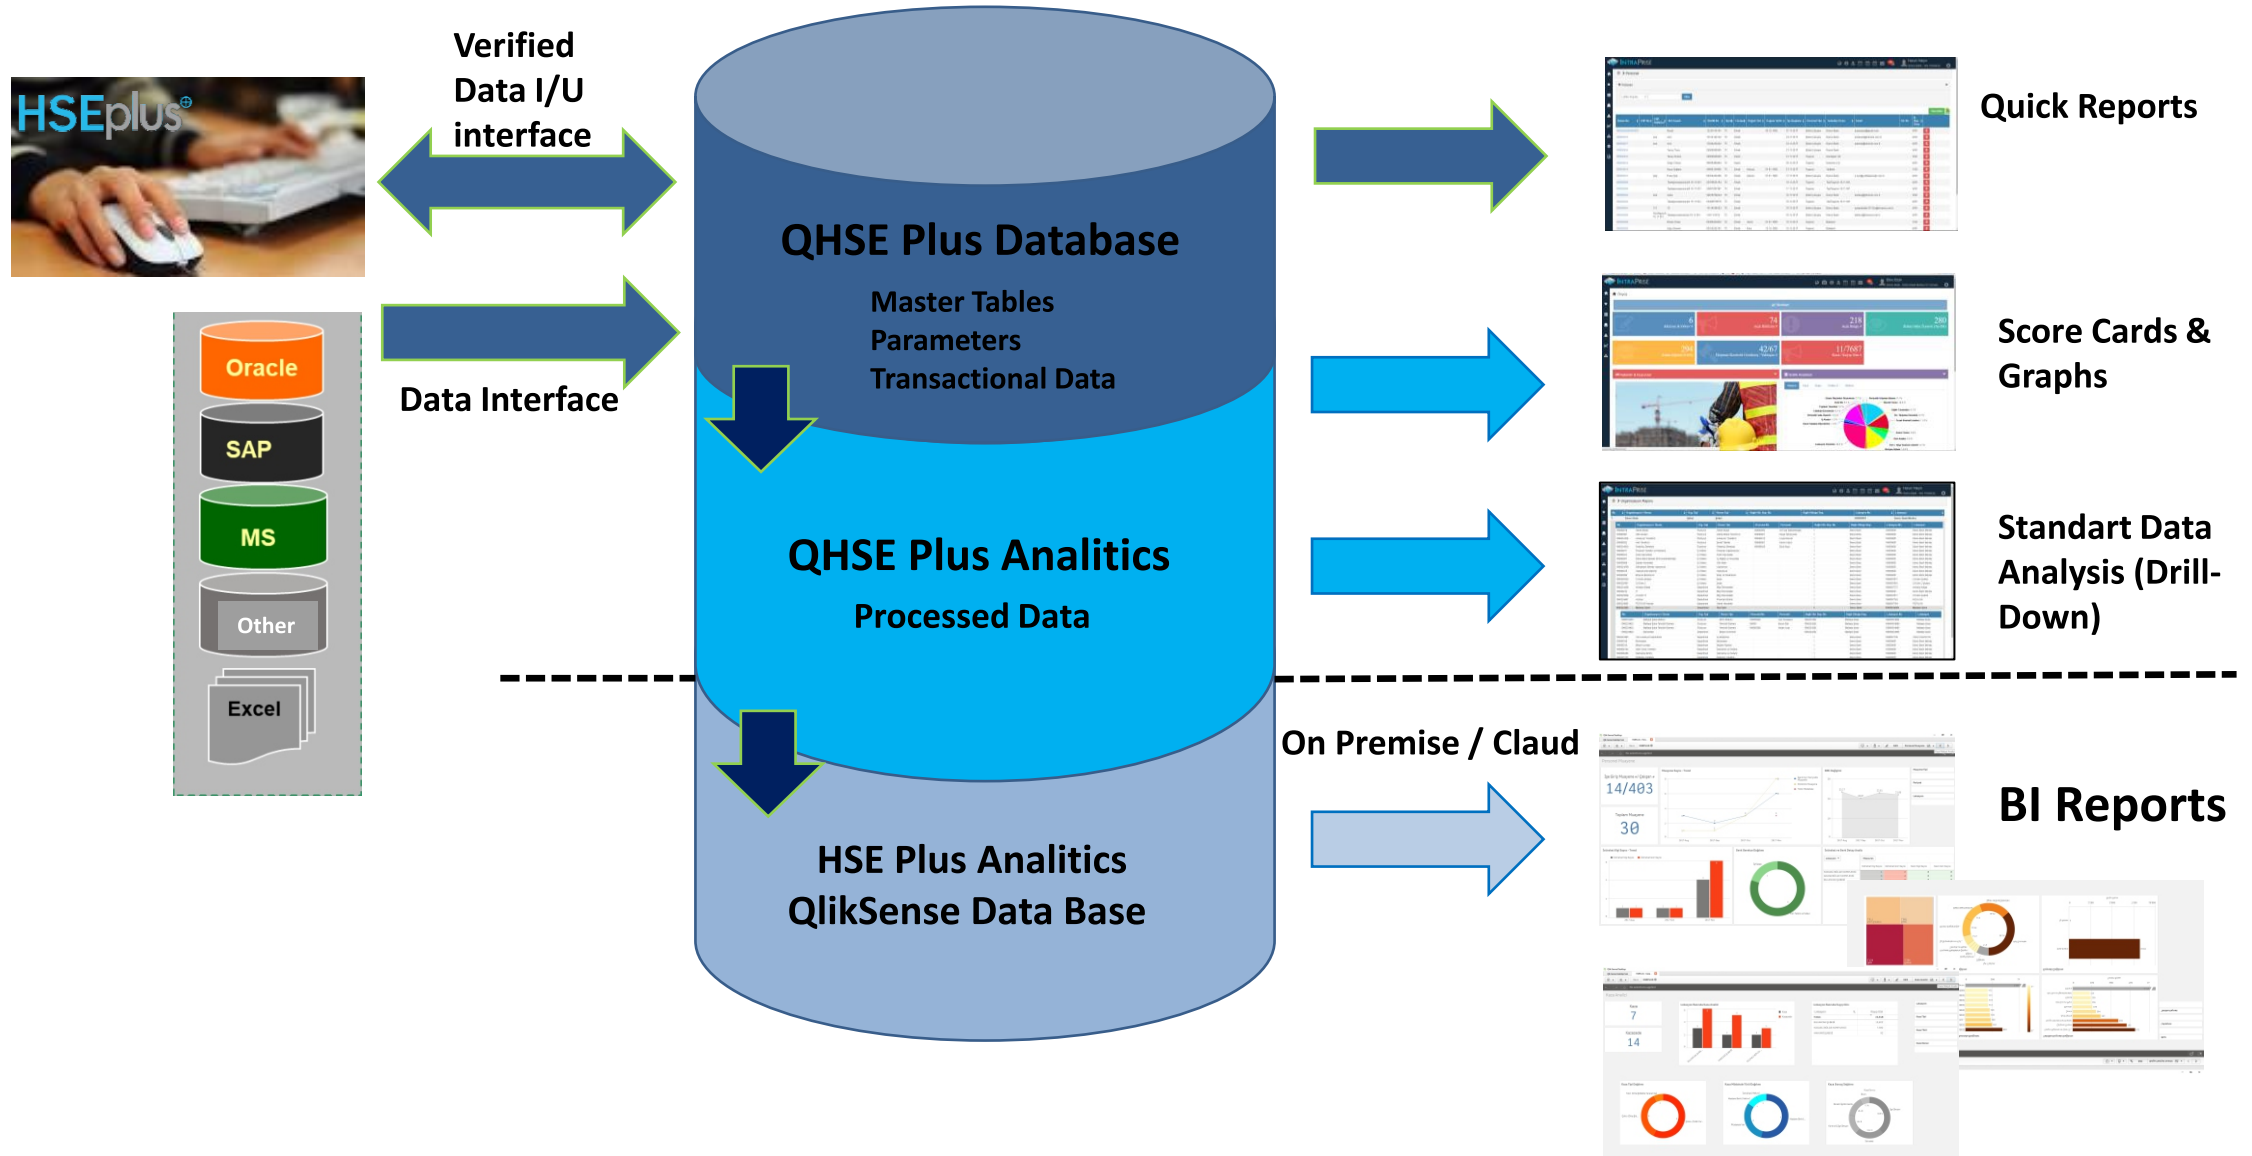

It allows to navigate through the data from summary to detail on the digital and graphical images.

- Scorecards
- Quick reports
- Managerial and analysis reports
- Operation reports
- Decision support systems (Qlick Sense)

Access the information from office, air, cafe and anywhere where Internet is available!

Scoreboard reports

Scoreboards are designed to provide you the important data. See them at first glance and drill down to detail as you wish.

Menu bar

News And Bulletin

Let your be informed about your corporation. News, trainings, events. Compact content management.

Analyze On Map

See your locations, customers hot maps right on geographical graphs. Click and see details.

Track & Edit Your Work On Calendar

Easy to use functional calendar will make your life easy. Be organized, automatically sync with your Google / Outlook calendars.

Live Notifications

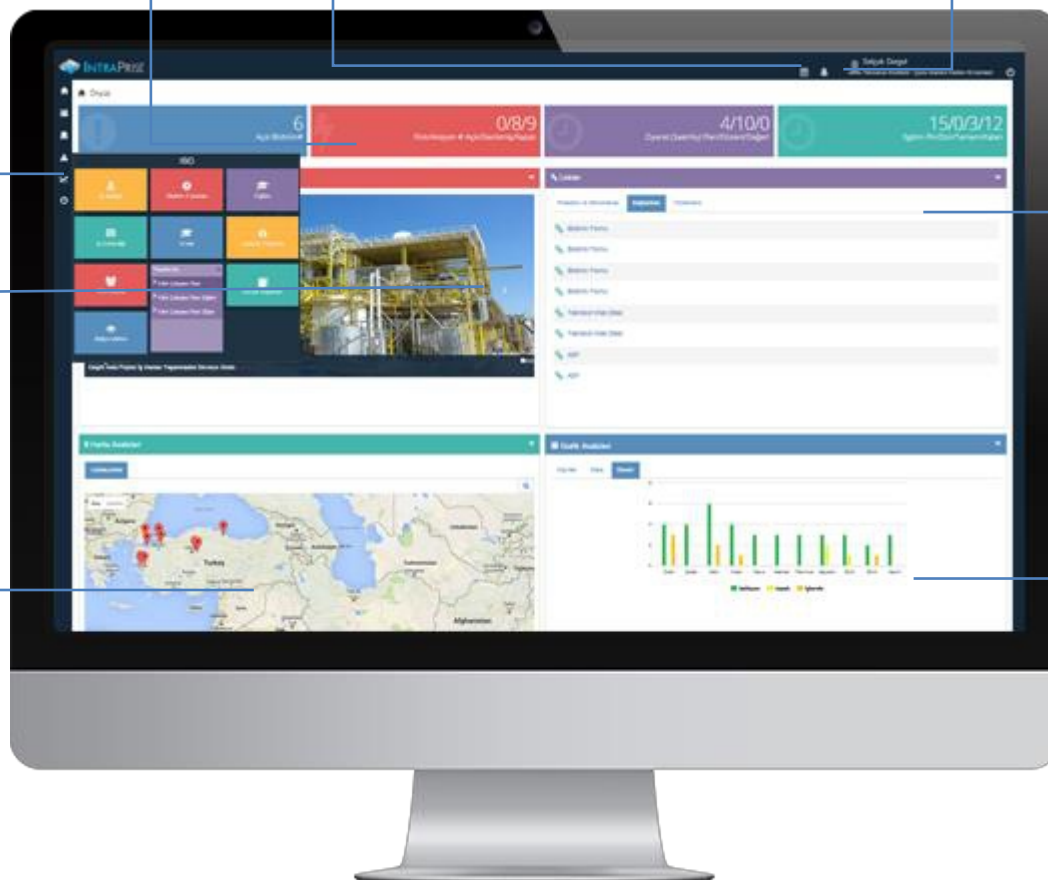

Be notified momentarily. The system will notify / remind you about everything you need to know.

Links, Documents, Procedures

Reach exclusive content through quick board. Just like news and bulletin it is the compact content management.

Graphical Analysis

Wanna see the specific data graphs? You can manage the desired data graphs on this section.

Drill Grid Report

Grid Report will show all the numbers on the data table.

Score Card Report

See total number at first glance and just click on it to get detailed reports

The image shows a computer monitor displaying the INTRAPRISE dashboard. The dashboard features a score card with several metrics: Kaza/Kayıp Gün # (4/0), Risk/Aksiyon # Açık/Geçmiş/Kapalı (25/9/21), Risk # Acil/Toplam (3/28), Çalışan Bildirim # Ramak/Durum/Hareket (4/3/3), Eğitim # Plan/Düzenle/Değerlen (314/1/2), Ortam Gözetimi # Plan/Düzenle/Değerlen (72/16/10), and Sağlık Gözetimi # Plan/Düzenle/Değerlen (54/5/3). A blue circle highlights the Risk/Aksiyon metric. Below the score card, there is a section for 'Haberler & Duyurular' and 'Linkler' with a list of links including 'OHSAS 18001 NEDİR?', 'OHSAS 18001 STANDARDININ YAPISI', 'OHSAS 18001'İN FAYDALARI', and 'ACIL EYLEM PLANI'. In the foreground, a smaller window shows a 'Periyodik Ekipman Bakımı' (Periodic Equipment Maintenance) grid report. A blue arrow points from the Risk/Aksiyon metric in the score card to the grid report window.

Ekipman No	Lokasyon	Ekipman Kodu	Ekipman Adı	KP(Gün)	Gelecek Bakım Tarihi
10000002	Demo Bank Merkez	13512	Mapeks Yangın Söndürücü - 6 Kg	365	05.01.2011

10000023	Demo Bank Merkez	dfsfdf 123574	Boya Tabancası	60	22.12.2017
10000011	Demo Bank Merkez	22223	A Tipli Hidrolik Pres	365	06.10.2018
10000007	Demo Bank Merkez	123454	Baskı Makinası	365	19.10.2018

Wizard Steps

Wizard steps will help you enter correct data easily. Navigate the steps for easy editing using wizard navigation bar.

The screenshot displays the IntraPrise software interface. At the top, there is a navigation bar with four steps: 1. Eğitim Bilgileri (selected), 2. Katılımcılar, 3. Bilgi Verme, and 4. Özel Bilgiler. Below the navigation bar, there is a sidebar with a tree view showing 'Form Bilgileri' and 'Eğitim Bilgileri'. The main content area contains a form with the following fields: 'Eğitim Tarihi' (14.10.2015), 'Eğitim Saati' (13.25), 'Yer' (Sarımsak), 'Süre (saat)' (2.5), 'Katılım Sayısı' (2), and 'Eğitim Pazarı' (ALBANY ROTARY GEAR/CENTRIFUGAL PUMPS). At the bottom right, there are two buttons: 'Gözet Ekran' and 'İlerle'.

Valid Data Entry

IntraPrise form structure is developed while keeping time consumption as a main concern. Therefore, it is designed to enter right data quickly.

Drill Grid Report

Grid Report will show all the numbers on the data table.

Score Card Report

See total number at first glance and just click on it to get detailed reports

The image shows a computer monitor displaying the INTRAPRISE dashboard. The dashboard features a score card with six colored tiles showing various metrics: Kaza/Kayıp Gün # (4/0), Risk/Aksiyon # Açık/Geçmiş/Kapalı (25/9/21), Risk # Acil/Toplam (3/28), Çalışan Bildirim # Ramak/Durum/Hareket (4/3/3), Eğitim # Plan/Düzenle/Değerlen (314/1/2), Ortam Gözetimi # Plan/Düzenle/Değerlen (72/16/10), and Sağlık Gözetimi # Plan/Düzenle/Değerlen (54/5/3). A blue circle highlights the Risk/Aksiyon tile. Below the score card is a 'Haberler & Duyurular' section and a 'Linkler' section with links like 'OHSAS 18001 NEDİR?', 'OHSAS 18001 STANDARDININ YAPISI', 'OHSAS 18001'IN FAYDALARI', and 'ACIL EYLEM PLANI'. A blue arrow points from the Risk/Aksiyon tile to a smaller window showing a 'Periyodik Ekipman Bakımı' grid report.

The grid report window shows a table with the following data:

Ekipman No	Lokasyon	Ekipman Kodu	Ekipman Adı	KP(Gün)	Gelecek Bakım Tarihi
100000002	Demo Bank Merkez	13512	Mapeks Yangın Söndürücü - 6 Kg	365	05.01.2011

*All personal data on HSEPlus are kept encrypted in database level.

*Personal information is always kept secure from unauthorized users, by either masking or completely hiding depending on the situation.

*System authorization can be also made via 2FA (SMS or EMAIL) All access, request and changes are logged in DB level.

*HSEplus is entirely complying to the requirements of ISO 27001 information security management system.

Performance Load Tests

HSEPlus has been tested several times by leading clients such as banks, airport management companies against unexpected loads.

Even though it passed the load tests successfully for a targeted number of concurrent instances, we are continuously improving the performance and scalability of our system.

Currently our cloud system hosts billions of lines of data and serves thousands of accounts on low cost server solutions.

The same infrastructure is always used on our on-premise systems.

Security & Penetration Tests

As the performance tests, our system is already tested against threats by leading companies.

This is a living product and the more we take it further with new features, the more we are conducting extensive tests for protection.

HSEplus⁺
