Best Restaurant Management Software with Restaurant Website

LIONPOS - Restaurant Management System | Restaurant POS Software

LIONPOS is the best restaurant management system with a website and mobile application. The restaurant management system will help to kickstart your restaurant business. You need a business plan and management system to accelerate your restaurant business. You do not need previous experience or single coding knowledge to handle this restaurant management software. You can give this responsibility to us, we have created a cost-effective software for you so that your restaurant billing software or restaurant POS software work together.

What is Restaurant Management System?

Restaurant Management System (RMS) is a versatile software that is a type of point-of-sale (POS) software. It will make your restaurant operation system easy and automated. This is an application that you can use as a computer application or server-based web application or mobile application. It can be used for any type of food business such as restaurants, hotels, bars, bakeries, cafes, food trucks, bistros, delivery businesses, homemade or online restaurant business, etc. It will manage everything from your account billing to staff management and keep the data secure.

Order Management System

An order management system is the most important feature of any restaurant management software. For this reason, Lionpos has an effective order management feature that helps to manage orders of customers. As well as, it helps to perform all order related activities automatically. There are 4 different lists for managing orders.

- Order list
- Pending order list
- Complete order
- Cancel order

Key Features For Restaurant Management System

LIONPOS is an online & offline restaurant management software, which manages to automate day to day activity of a restaurant. Now, we want to describe some features of LIONPOS that will help you understand the operations and perform your works efficiently.

Restaurant POS Software

Restaurant point-of-sale or POS software is a vital component for managing the restaurant order. LIONPOS restaurant POS will make your business easier to manage your dine-in, walking order, online order and third party food order. LIONPOS restaurant POS module emphasizes on the latest restaurant, hotel, coffee shop business pattern. Therefore, it will be easier to compete in a competitive market. Hakfood restaurant pos has user-friendly UI and easy navigation system for any type of user. Restaurant POS window has all you need to manage the order at your fingertips. Features of Restaurant POS Software are below:

- Take Order from customer
- Manage online order
- Check food list
- Token printing system
- Online order notification
- Manage on-going order
- Assign a customer to a waiter
- Find today's orders
- Print invoice for complete orders

QR Code Scanner

QR Scan ordering system is a new technology for restaurants to manage contactless orders from dine-in customers. This module will allow your customer to place an order from seating on the table by scanning the QR image of your digital menu. QR scan ordering system will allow avoiding direct contact with a customer. With the QR code scanner system, customers can be placing their order more efficiently without taking any help from waiters. It has a cash-on and payment gateway option which will allow the customer to pay their bill smoothly.

- Contactless order from the dine-in table
- Real-time order update in the POS
- Order Accept & Reject option from admin end
- Order bill collection via cash or payment gateway.
- Existing order edit and update option.
- Digital menu system.
- Supported by any type of mobile device.
- Previous Order remembering option for an existing customer.
- Real-time order update status in the customer device.

Kitchen Dashboard

The Kitchen Dashboard interface displays a grid of order cards. At the top, there are tabs for different cuisines: Bangla, Beverage, Chinese, Common, French, Indian, Italian, MAIN, and Mexican. A 'Refresh Page' button is located in the top right corner. The dashboard is organized into two rows of four cards each. Each card represents an order from a specific table (03, 05, 09) and includes the order number, customer name, and a 'Cooking Time' section. The items listed are 'Chana Aloo Masala 1:2'. The cards are color-coded: green for orders with 1X quantity and red for orders with 8X quantity. Each card has a 'Prepared' button and, for the 8X orders, an 'Accept' and 'Reject' button.

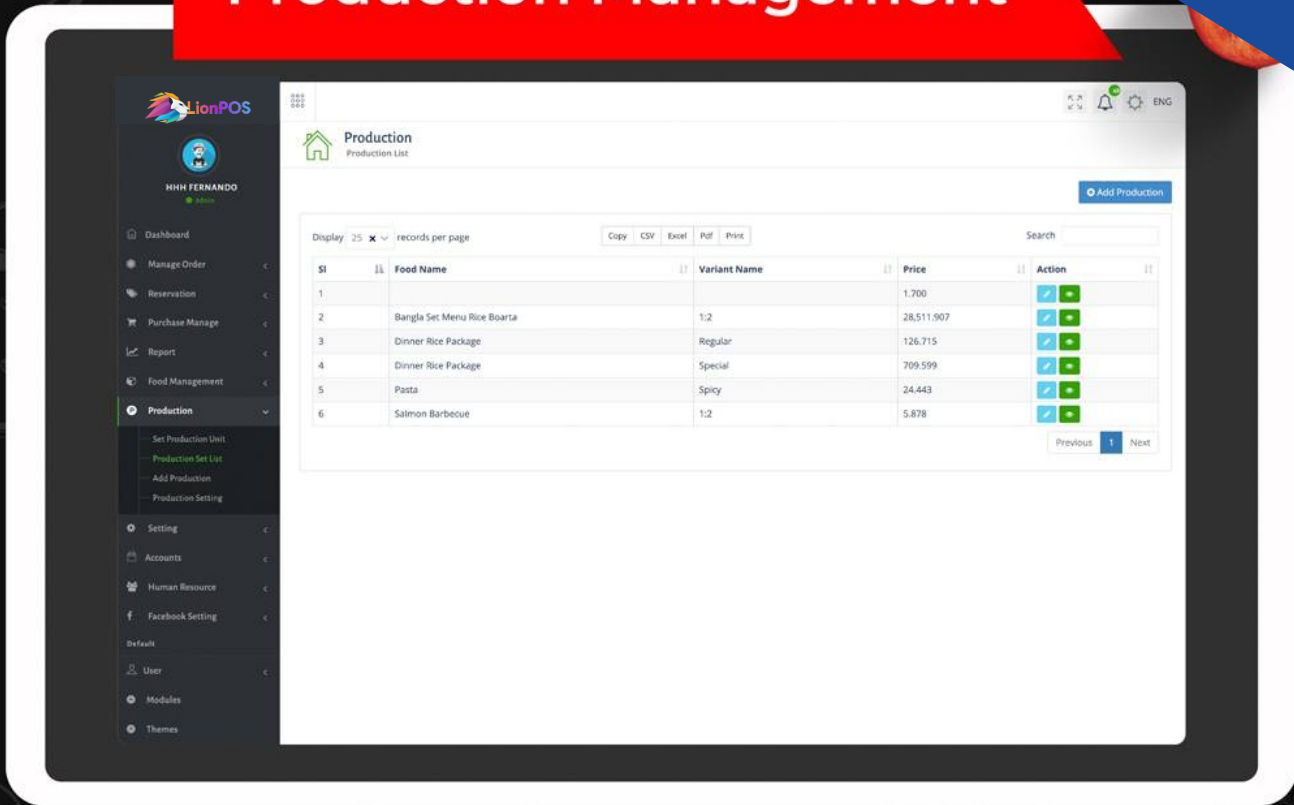

Order Time Countdown

The Order Time Countdown Board interface displays a table with the following columns: Table No, Order Number, Order Time, Remaining Time, and Status. The table lists 11 orders, with the first 10 having a 'Time Over' remaining time and the last one having 51 minutes remaining. The status of each order is either 'Processing' or 'Ready'.

Table No	Order Number	Order Time	Remaining Time	Status
0	9582	00:58:31	Time Over	Processing
0	9584	03:04:59	Time Over	Processing
0	9585	07:14:44	Time Over	Ready
0	9586	07:16:08	Time Over	Processing
0	9587	07:16:20	Time Over	Processing
0	9588	07:19:54	Time Over	Ready
0	9590	08:45:36	Time Over	Processing
0	9591	09:51:39	Time Over	Processing
51	9592	12:56:15	Time Over	Processing

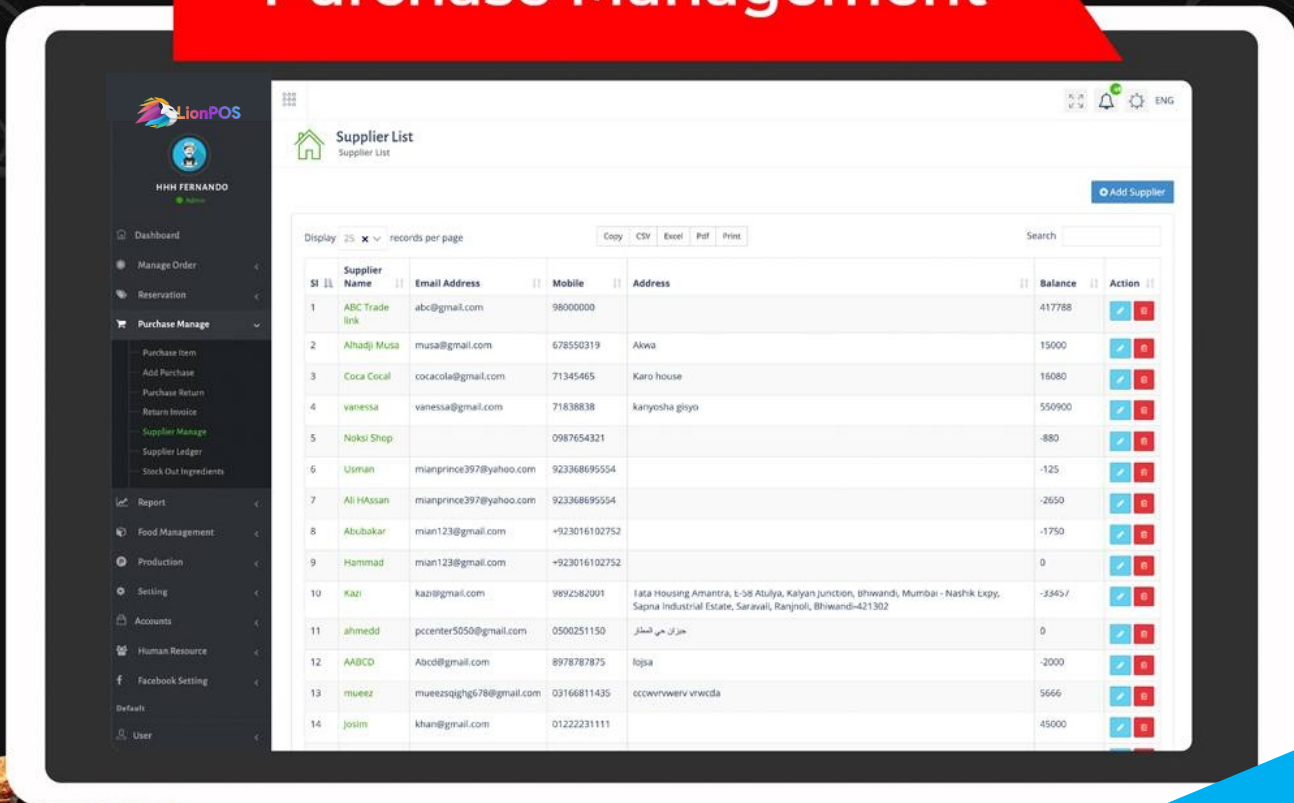

Production Management

The screenshot shows the 'Production' management interface in LionPOS. The left sidebar contains navigation options: Dashboard, Manage Order, Reservation, Purchase Manage, Report, Food Management, Production (selected), Setting, Accounts, Human Resource, Facebook Setting, Default, User, Modules, and Themes. The main content area is titled 'Production' and 'Production List'. It features a table with columns for SI, Food Name, Variant Name, Price, and Action. The table lists six items with their respective prices and variant names. Below the table are pagination controls for 'Previous' and 'Next'.

SI	Food Name	Variant Name	Price	Action
1			1,700	<input type="checkbox"/> <input type="checkbox"/>
2	Bangla Set Menu Rice Boarta	1:2	28,511.907	<input type="checkbox"/> <input type="checkbox"/>
3	Dinner Rice Package	Regular	126,715	<input type="checkbox"/> <input type="checkbox"/>
4	Dinner Rice Package	Special	709,599	<input type="checkbox"/> <input type="checkbox"/>
5	Pasta	Spicy	24,443	<input type="checkbox"/> <input type="checkbox"/>
6	Salmon Barbecue	1:2	5,878	<input type="checkbox"/> <input type="checkbox"/>

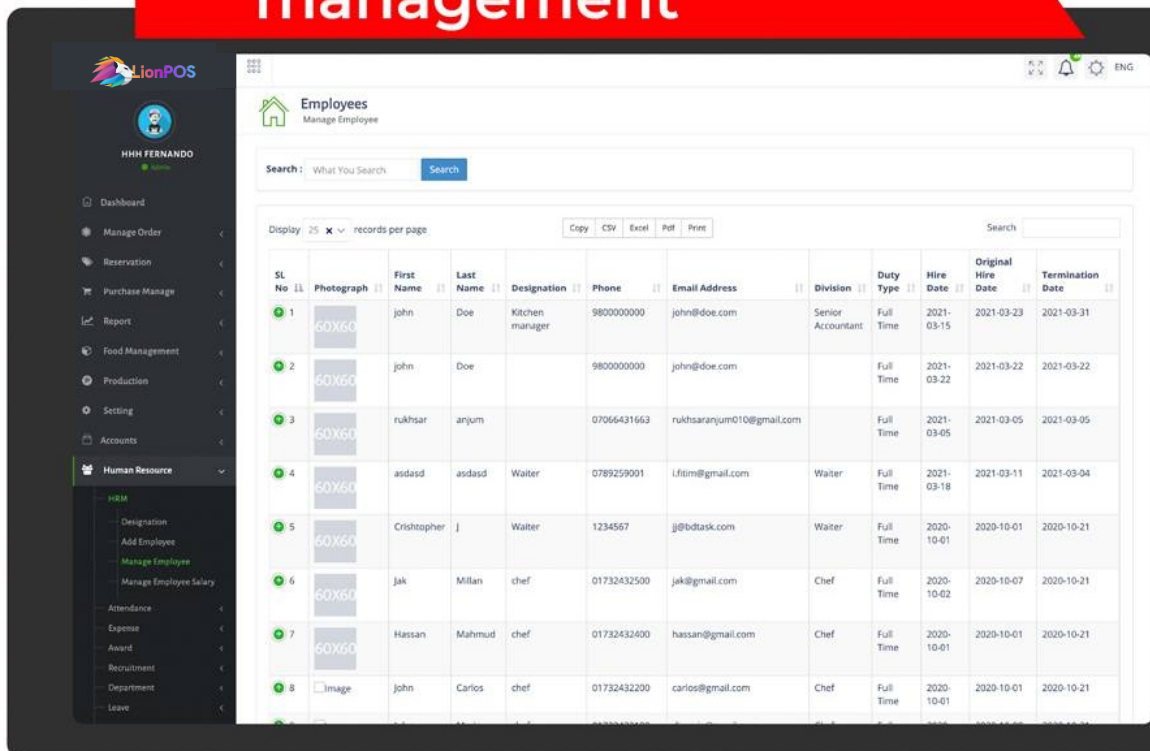

Purchase Management

The screenshot shows the 'Supplier List' management interface in LionPOS. The left sidebar contains navigation options: Dashboard, Manage Order, Reservation, Purchase Manage (selected), Report, Food Management, Production, Setting, Accounts, Human Resource, Facebook Setting, Default, User, Modules, and Themes. The main content area is titled 'Supplier List' and 'Supplier List'. It features a table with columns for SI, Supplier Name, Email Address, Mobile, Address, Balance, and Action. The table lists 14 suppliers with their contact information and current balances. Below the table are pagination controls for 'Previous' and 'Next'.
